Seymour attempted the other day to bring his party out, and compatitate. Maine, however, a Democratic Convention has been called, with the avowed purpose of "opposition," and the State is being crossed and recrossed by Democratic leaders, attring up the people in the towns to make an active compaign. The Portland Advertiser says the leaders of the late Breckinridge Democracy, some of whom arow sympathy with the rebels, are the most sective in this movement, and, especially in Oxford County, small factions still exist, the members of which openly express the hope that the civil war will result in the overthrow of the Federal Government.

The appointment of Gen. Fremont to the command of the Department of the West inspires the hope that some decisive exployment may be given to the Illinois soldiers at an early day. The brigade at Cairo will suffer a large depletion at the expiration of the three months' term of enlistment unless the prospect of active duty to presented to the men without further delay. They did not enlist to fight musquizoes and run the hazard of typhoid fever at Cairo. They did not take up arms for the sake of eleven dollars per month and indifferent board and clothing. They went forth at the call of the President to exchange bullets with traitors, and to exchange bullets with traitors, and to plant the stars and stripes on the highest elevations of Memphis and New Orleans. If they can be assured of speedy employ-ment in this line nearly all will re-ealist der Gen. Fremont for the full term of he war, be it longer or shorter. They have had little encouragement to continue in the service, but the large majority will

Reports have, within a day or two, reached this city that the Stoux Indians bare coommitted some depreciations up the Platte Villey, though nothing definite in known. A deling Governor Paddock immediately telegraphed to the commander at Fort Karsay to send a company of dragoons to the reported place of the depredictions, and also to the War Department at Washington, for authority to any point where needed. The force is ample, to protect our whole frontier.

His prompties in procuring troops to look after the Stoux is deserving of mach praise.

The first examination of teachers for professional State certificates, under the act of last winter was held at the University during Monday, Thesday, and Wednesday, and form cd a marked feature of the woock. The reasons in support of the measure will be found fully set forth in the last blennial report of the State Superintend-

est.
The examination just held was both written and oral, and of a very searching character.

county, immedication.

The great majority of the business transacted factured for eight men, and we had act the top of each other. Now to factured for eight men and it—and our mens has never hamington, a matter of public interest. The financial control is blankets, cramelled dition of the State University has engaged the entire attention of the Board, during two days. I have already stated what disposition had been made of the \$65,000 appropriated by the last Legislature. When that appropriation was saked, it was supposed that the amount would be sufficient to free the institution whosly from debt, but it now appears that there are still debts outstanding, to the amount of at least \$30,000. This has been a matter of surprise and of much anxiety to the Board of the state of the

surprise and of much anxiety to the Board of Education.

This, however, is but the history of the erection of all public buildings. An ap-propristion is asked for, and when it is ex-pended it is discovered that another is needed to complete the work. Our State institutions at Jacksonville, at alton, and at Joliet, are in-stances, and it was hardly to be expected that our State University would prove an excep-tion to the rule. The amount saked for and obtained from the State through the last Leg-islature, was based upon estimates of probaislature, was based upon estimates of proba-ble indebtedness, and the expenses of com-pleting the work, and not a final settlement picting ine work, and not a man settlement of the whole mater, as has generally been supposed. The data were, it would seem, very imperfect, and being destrous to ask for as small as amount as possible, the Board now find themselves still incumbered with debt small an amount as possible, the Board now fird themselves still incumbered with debt This result is very disher-tening to those who who have for so long a time straggied against every difficulty that it deemed possible to place in the way of its accomplishment.

But there, crowning the rolling swell of the prairie, stands the now completed building of the Normal State University, and there will it remain for coming years, a monument to the energy of those who have carried it through, and to the enlarged foresight and admentional sympathy of the State of Illinoid. The State needs it, and cannot now afford to lose it, or to have its usefulness and prestige crippled by the embarassment of debt. Another apprepriation will be made, and five years honce those whose hearts are now anxious will look back to the precent as but the pleasant history of a struggle and a suncess.

The appointment of C. W. Holder, Esq., as Treasurer puts a business man at the helm, and is a sure guaranty that henceforward the Board will know at each moment exactly where they stand, and that there will be no more appropriations asked for based upon insufficient and imperfect data.

We have never received one cent of money from either the State or Federal Government since we enlisted, and our State has charged as two prices for creything we have purchased of him. We have never received but the half of a blanket apices, and for more than a week at Camp Istes, during the cold hights in April, many of us by two under one of those half blankets.

At Bird's Point the guards around the camp are so stationed as to allow the soldiers the privilege of nearly a mile square, and in the other regiments here the guards around the camps are placed at some distance from the tents or quarters, while the liths guards are as near to the fents as they possibly can be placed, the fartherest run we have being to the sink, which is less than 100 yards to the rear. They even have a line of guards between the Companies' and the Regimental Officers' ents, a dichance of not more than 20 yards.

Col. Schutiner's Regiment of Missouri, encamped just below us, go in and out at their picapure, while we can have neither in nor out without the within document from the officers.

days after our arrival at Camp Bissent, some of our men stood eight hours on a single stretch, at night, in a dronching rais. We never received any uniforms but an alama-house uniform (grey shirts and overalle), until July 1st, while tail the other companies excepting. J got theirs before leaving Camp Blasell. On all our passages by railroad, Co. K has had buggage or freight cars to ride in, while those who proceed us siphaetically filled up the first-class cars. On our steamboat trip from \$t\$. Louis. Co. K had a forward deek passage amongst the cost, while the other companies occupied upper deck and cabin.

On the secont into Missouri, June 23d, during the passage to Commerce, Co. K lith Registent, had the same berth assigned them, and on the downward trip diffic. Gen. Fremont's Command.

[Cerrespondence of the Philadephia N. American.]

Major General Fremont, after much discussion and delay, has been ordered to the command of one of the greatest and most important enterprises of this war. It is not, as has been supposed, a new design made for him, but was part of Lieut, General Scott's splended and comprehensive plan of campaign, and has only been swatting the funding of a suitable to teader and the presentation of a suitable to teader and the presentation of a suitable to teader and the presentation of greater and the presentation with any reasonable hope of apeedy success; for, as Lyon could not be apared from Missouri, there was not a proper man to replace Frentiss at Cairo, in case he should leave, and McCledan was fine the preparations went on. For this purpose the President and War Department have accepted large numbers of additional broaders will be immediately built for the expedition at Cheinanti and other ports. This part of the expedition was delayed in consequence of Gen. McCledian's builter that gambosis could not be used with success. Buoux-Wanear Floura.—Our commission dealers at present are very much annoyed by the flour sent to them from the interior being abort-weight. We are reliably informed that nearly two-thirds of the flour inspected in this city stoce the appointment of Mr. Dales, the inspector, has falles short from one to four the pur bil. In such cases, it is well for milliers to understand, that purchasers ciaim that the seller shall either dil up each barrel to the leg I weight, or allow not only for the flour for the floor for the short of filling.

In this coancetion we would state that since Mr. Dales has been appointed, burers have found it greatly to thair interest to have their purchases inspected. The supenne is triffing, and it enables sellers to have all difficulties settled right here, instead of having to wait for returns from the 1000 BARRELS GLUE. Of our own manatacture.
